

Heritage Treasure

An In-Depth Analysis of UNESCO World Heritage Sites

Problem – Solution Analysis

.No	Major Problem	Description	Example Site	Proposed Solution
	Over-Tourism	Excessive visitors cause damage and pollution	Venice (Italy)	Visitor caps & timed ticketing
	Climate Change	Rising temperatures & coral bleaching	Great Barrier Reef (Australia)	Climate action & restoration programs
	Urbanization	Encroachment & infrastructure expansion	Kathmandu Valley (Nepal)	Strict zoning & buffer zones
	Pollution	Air pollution damages monuments	Taj Mahal (India)	Green zones & industrial restrictions
	Armed Conflict	War & terrorism destruction	Palmyra (Syria)	Digital documentation & global cooperation
	Poor Funding	Insufficient restoration funds	Angkor Wat (Cambodia)	Public-private partnerships

Conclusion

- Effective government regulation is essential.
- International cooperation strengthens preservation efforts.
- Technology helps monitor and protect heritage sites.
- Sustainable tourism ensures long-term protection.
- Community participation increases conservation success.
